FEATUES

The Edis 5 hour LED Emergency Lighting Emergency lighting for more than 5 hours beats blackouts, with automatic switch-on when grid electricity fails and automatic re-charging when electricity from grid is restored - ready for the next event. Corrosion and high temperature resistant. High capacity and explosion proof battery provides a stable and long time lighting. Test switches and charging indicators indicate lamp status. No maintained emergency lighting. High brightness strong LED lighting creates bright color rendering. Long service life manufactured with high quality materials. Suitable for use in a variety of environments, homes, shopping malls, hotels, schools, care homes, supermarkets, offices and many other locations. High light transmission PC covers with high brightness LEDs. Test Button and Power Indicator control the light is functioning. Base and rear hanging design (20cm between 2 holes) means the light can be table or wall mounted. Adjustable Lamp Head 360° rotating individual adjustable lamp heads.
