● Professional Monitoring for Any Studio

Studio monitors help you track, monitor and mix with confidence by providing precise sound and dynamic acoustic control. Delivers flat frequency response, enhanced stereo imaging and greater clarity for authentic mixes in a space-saving design.

● The tweeter waveguide is enhanced to provide a wide sweet spot and superior stereo imaging. A wider mix position lets you monitor professionally in any level of studio.

● Acoustic Control

Mixing isn't done in a vacuum, and your listening environment influences your mixing decisions and ultimately, the sound of your music. Helps provide the best acoustic conditions for tracking, mixing and monitoring anywhere. Adapts to any mixing environment - from bedrooms to basements to professional studios - without compromising frequency detail or stereo image. The result is a flexible monitoring setup for the most demanding mixing environments.

SPECIFICATION

Program Power	130W
Output power (woofer)	70W
Output power (tweeter)	60W
Maximum SPL@1m	100dB
Response at (-3dB)	38Hz-22KHz
Crossover Frequency	2.2KHz
Number of Amplifiers	2 CH
Input Sensitivity	85mV(90dBA)
High-shelf filer(-5dB±3dB)	20KO balance
Low-shelf filer(-5dB±3dB)	10 KO unbalanced
LED brightness setting	√
Connectors	1xXLR/1xTRX
Full output	70VA
Power Requirements	115-230V~50-60Hz
Dimensions(WxDxH)	250x300x410mm
