## FEATUES

- Smart charging cabinets are used for safe management, unified storage, centralized management, separate storage, convenient access, and safe charging. SPCC cold-rolled steel plates are used, which are slightly more resistant to compression, not easy to deform, and have a long service life. Applicable scenarios, giving you the care and peace of mind you want, suitable for multiple high-power devices.
- Wide compatibility and free storage, suitable for charging various models of tablets and mobile phones. The partitions separate and dissipate heat better. The ABS material is practical and beautiful, with strong toughness and strong support, and is easy to store and access.
- Safety lock, anti-theft lock core safety design, easy to unlock, safer and more convenient to use. External emergency socket design, socket interface configured on the chassis shell, convenient for managers or teachers to directly charge and power external devices, convenient and fast
