

EP23 Projector Mount

Key Features

This Projector Mount is a universal projector ceiling mount suitable for the installation of almost every data projector available except for single screw mount versions

Supplied with a 1.5m pole designed to be cut to length on site or a "flush-mount" used where the projector is installed as close to the ceiling as possible.

Supplied with a tilting mechanism security bolts and a safety fall-arrest tether which secures the projector to the ceiling bracket,

Maximum safe working load of 20kg.

also available in 2 part and 3 part telescopic versions with more manageable packing and easier to adjust on site
