●Suitable for reading, writing and burning integrated optical drives for files, movies and teaching. Stable and non-slip hidden interface line, non-slip rubber pad design, increase desktop friction and stable placement●

Combining the drive design of USB-A 3.0 and Type-C dual-interface data cable, it can work normally even on ultra-thin laptops without USB interfaces. The machine can be used on any laptop or desktop.

●The movement has strong error correction ability, shockproof, low noise, and can be placed horizontally or run independently. The circuit optimization design is energy-saving and power-saving, and no external power supply is required.

●Adopting 12.7mm ultra-thin high-quality movement, the whole machine is light and portable. Driver-free, plug and play

●The machine is embedded with a unique anti-burning control chip, which can effectively prevent the probability of burning the disc during the burning process, and has a super disc reading error correction function, allowing you to enjoy high-fidelity sound quality DVD burning and CD while backing up data.
