

Outdoor framed LED display

SKU:

EAN:

FEATUES

● Lightweight and easy to transfer

The outdoor ultra-thin LED poster adopts an aluminum box and an ultra-thin frame to achieve lightweight. The lightness makes the outdoor ultra-thin LED poster more refined in appearance and easier to transfer in use, thus saving labor and energy.

● Creative design allows for multiple installations

In order to meet the requirements of different installation locations, the LED poster machine integrates multiple installation methods into one box. The outdoor ultra-thin LED poster supports free-standing, wall-mounted, hanging and creative splicing installation. There must be one that suits your project.

● More user-friendly intelligent control

The outdoor ultra-thin LED poster is basically a plug-and-play device. Supporting WIFI, USB, network cable and HDMI connection, you can use smartphones and computers to send videos, images, texts, etc.

● High brightness for excellent display effect

One of the great advantages of LED display is its high grayscale, which makes the colors on the display more vivid and impressive.
