SKU:

EAN:

## FEATUES

● Three-dimensional immersive space

High-quality VR content takes you into a new world, making dreams within reach. A deeply customized OS for VR, integrating applications, entertainment, and social interaction

● Home Private Theater

Videos are rich and varied, including 3D blockbusters, live concerts, and selected events updated in real time. You can watch the content of major video platforms! There are also high-quality applications and games waiting for you to experience.

● Wireless Bluetooth headset

Wireless headset automatically connects when powered on, making it more convenient to use. If your phone does not have a headphone jack, you don't have to worry about plugging in an adapter cable.

● Fully immersive 110 degree wide viewing angle

Using Japanese SLR optical grade PMMA material, the 35MM short focal length design brings a 110 degree wide viewing angle, which is closer to the real viewing angle of the human eye.
